

CAD Support Upload Doc

Openreach Site Registration is completed via

<https://www.openreach.com/fibre-broadband/fibre-for-developers/registering-your-site/>

The registration process requires the Mandatory Upload of

- A. Detailed Site Plan (.PDF or .DOC)
- B. Location Plan (.PDF or .DOC)

The purpose of this document is to be uploaded in place of either/both of these files when submitting a .DXF CAD file instead.

NOTE: This document can only be uploaded in place of the Detailed Site Plan and Location plans if you are following the CAD process and submitting a CAD drawing in .DXF format

By attaching this file in place of the detailed site plan and location plan I can confirm that I have read the 'Developer Guide - Site Registration & CAD' document and submitted my site plan in accordance with the mandatory requirements.

I understand that failure to do so may result in delays processing my request and further contact with Openreach to clarify any missing information.
