Openreach

April 2021

openreach

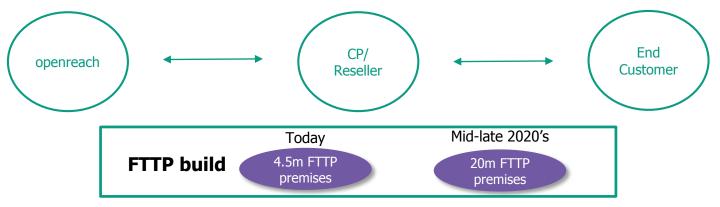

Who are we?

Openreach looks after the fibres, wires and cables that connect the country. So whether you're making calls, video conferencing with clients, sharing files, downloading music, streaming movies, or indulging in a bit of online retail therapy – it's most likely on our network.

We don't sell phone, broadband or TV services to end customers. Instead, we work on behalf of over 650 Communications Providers (CPs) (such as Sky, TalkTalk, Gamma, BT and Daisy) to maintain the local access network that's available to 31.8 million customers, supporting 300 million telephone calls and 350 million internet connections every day.

We are:

- Investing £3 billion to upgrade our network and £14 billion over the past 10 years
- Making sure that over 28.5 million homes and businesses already have access to superfast fibre broadband of over 30Mbps
- Adding over 42,000 Fibre lines every week.
- Helping Industry prepare for the change

What is the ALL IP Programme?

There are two parts of the programme: 1. The withdrawal of the WLR portfolio and 2. Roll-Out of FTTP

WLR Withdrawal

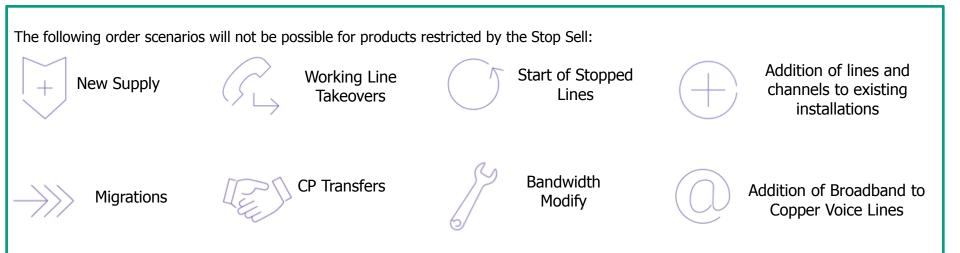

- The UK PSTN network is reaching end of life, and will be shut down at the end of 2025
- The current portfolio of older lines that form the WLR product family will be withdrawn by the end of December 2025
- The WLR product family is made up of WLR analogue, ISDN 2, ISDN 30 and broadband that runs over analogue lines
- All end customers must move from the withdrawn products before the end of December 2025
- Currently there are around 15M lines and channels to minimise the scale of migration, a National WLR "Stop Sell" will be implemented in <u>September 2023</u>
- openreach will not provide a voice offering post WLR withdrawal

FTTP Exchange Upgrade

- FTTP is now being rolled out across whole exchange areas on a quarterly notification cycle.
- When FTTP coverage reached 75% of all premises in an exchange area, a "Stop Sell" will come into effect for all copper based services where the premises is enabled for FTTP. 220 Have already been identified and communicated to CPs
- "Stop Sell" means that there will be limitations for new supply and what can be done with existing lines.

- Stop Sell restricts the usage of certain products where there is a strategic aim to withdraw the product at a later date.
- Where the strategic product is available at the premises, order restrictions will be applied, prioritising use of the strategic product(s). Exceptions can apply.
- Where the premises has not been enabled for the new technology legacy products will still be available.

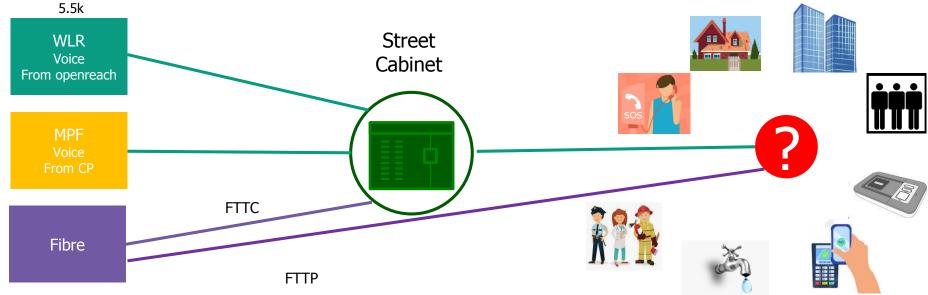

- If you use hardware that depends on a WLR line, this may not work when the line is converted to ALL IP
- Check that your CP is fully engaged in the ALL IP programme and understands what that means for you
- End customers using WLR and related products <u>must</u> migrate to alternative products based on Broadband
- In-building wiring may not continue to function.
- Carry out a lines inventory and determine how each are being used
- Develop a migration plan with your CP
- Start now!

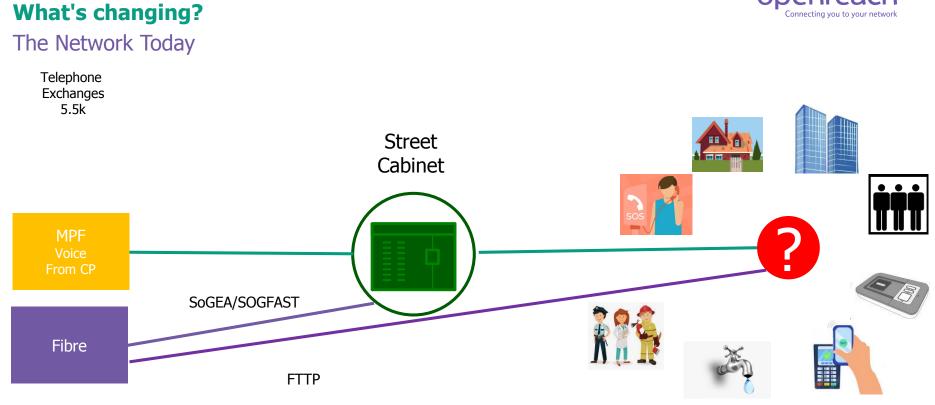

- Check your products and services in the installed base to ensure they will work in an ALL IP Environment. e.g. 50v no longer supplied from Telephone Exchange
- There will be Test Labs in future for you to test your products in an ALL IP environment Assume they wont work!
- Be careful with your procurement strategy and beware of buying equipment that isn't ALL IP ready.
- Extension sockets may not continue to work, so your customer's hardware may need to be moved
- Communications providers will be in touch with their customers so you need to make sure your ready for queries on this from your customers
- There is a tendency to put off the testing and decision making, but what you do now could affect you and your customers for years to come.

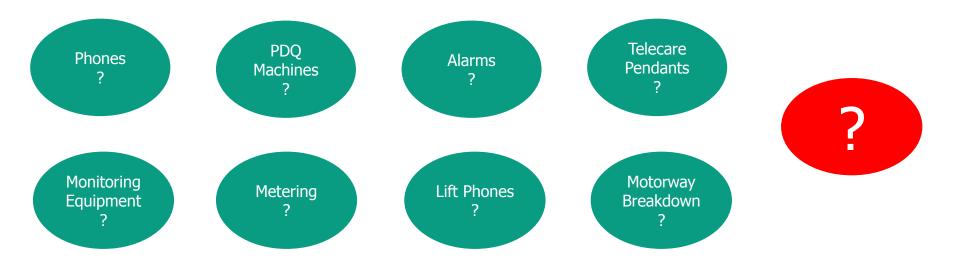

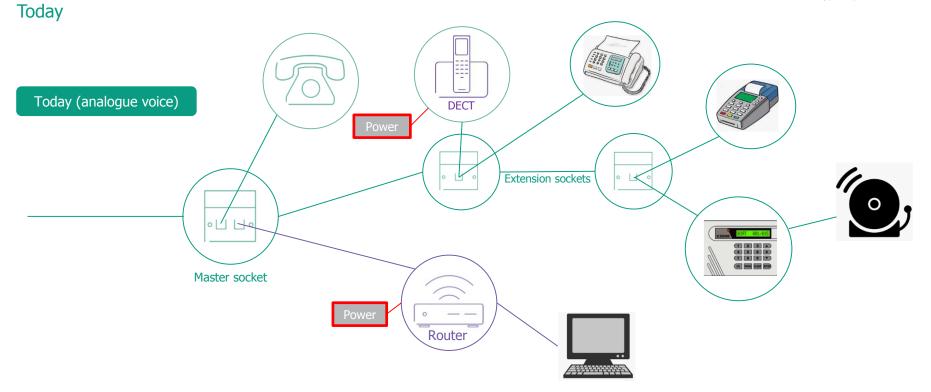

If you have products connected today into a telephone line these may not work when the line is changed migrated to ALL IP

You know your business better than anyone. Take the lead in protecting your business and your customers

So what's changing inside the premises ?

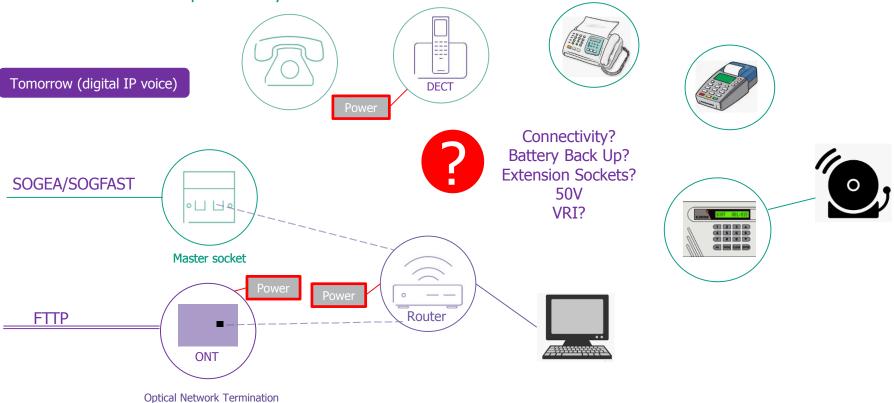

So what's changing in the premises ?

The Future-Services are provided by the Router **not** the wall socket

Salisbury and Mildenhall trials

Salisbury, Wiltshire

FTTP transition

Single exchange area

- 20.5k residential premises
- 1.5k business premises
- The exchange is an OHP
- WLR and MPF will be subject to stop sell

	Milestone	Date
Trial dates are firm:	Trials start	6 Jan 2020
	Salisbury Products Stop Sell	1 Dec 2020
	Mildenhall Products Stop Sell	4 May 2021
	Salisbury Products withdrawal	5 Dec 2022
	Mildenhall Products withdrawal	5 Dec 2022
	Trials Closure	16 Dec 2022

SOGEA transition

•

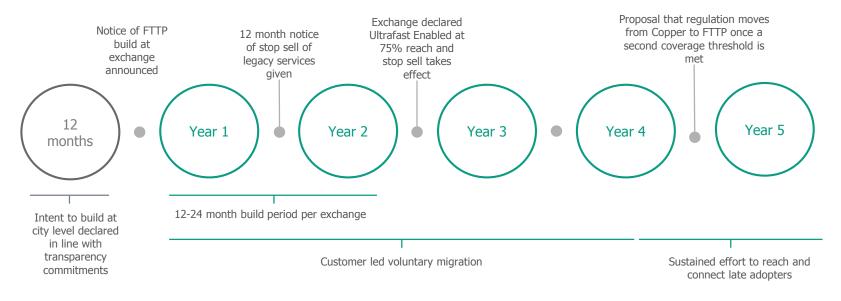

- 7.5k residential premises
- 750 business premises
- OHP at Newmarket
- WLR and MPF will be subject to stop sell

Commercial offer in place

Exchange upgrade programme

A planned 5/6 year cycle per exchange for FTTP deployment and transition

220 FTTP exchanges are already under stop sell notification (c. 2.2M premises)

Update on progress in transitioning to All IP Stop Sell locations are growing quickly as FTTP build grows

FTTP build 4.1m FTTP 4.5	rch 2021 Mid 2020's im FTTP 20m FTTP remises premises	
Salisbury is now live and we will be announcing additional FTTP stop sell exchanges every quarter	As announced, the Stop Sell implementation rollout across exchanges will begin in June 2021	
National WLR Stop SellSeptember 2023	29 June 2021 Stop Sell for:117 FTTP exchanges 1.2m premises	
Salisbury Stop Sell implemented1 December 2020	5 October 2021 Stop Sell for: 51 FTTP exchanges 511k THP coverage	
Mildenhall Stop sell May 2021	25 January 2022 Stop Sell for: 51 FTTP exchanges 429k THP coverage	
Tranche of FTTP exchange Stop SellNotified on 25 January 2021	Total announced so far: 220 FTTP exchanges 2.2m THP coverage	
Ongoing quarterly Stop Sell exchange announcements		

So, what should I do now ?

- Think about the services provided over your customer's lines and your own.
- Will they work on an All IP network ?
- What about local powering and battery back-up ?
- What will you say to your customers and when ?
- How will your and your end customer migrations be performed ?
- Plan there seems to be plenty of time to complete the change, but there is so much to do
- Talk to Communication Providers
- Keep tabs on our Industry Web Site https://www.openreach.com/upgrading-the-UK-to-digital-phone-lines/industry
- Register for our newsletter https://www.openreach.com/wlr-withdrawal-newsletter-subscription-form
- Test at our lab (current launch date July 2021)
