The above table contains a list of Openreach's FTTP locations within our current Fibre First Towns, Cities and Boroughs Build Programme as well as Market towns and villages build Programmes (the vast majority of which are in Area 3).

It doesn't show FTTP deployment related to BDUK, new sites/retro new-sites and other smaller scale programmes or infill. Openreach has exercised its best efforts to ensure that the contents of this table accurately reflect its relevant FTTP build plans at the time of publication. Details at an exchange level are shown only where Openreach expects that it will build in the greater majority of the relevant exchange. Openreach will keep this information updated on a rolling basis, including to reflect any possible changes to existing plans which may become necessary due to unforeseen operational obstacles (particularly where build is yet to commence).

'We've finished the main part of our build in this exchange' refers to the exchanges where build has been largely completed as part of the FTTP Fibre First Towns, Cities and Boroughs Build Programme or Market town and Villages programme, but doesn't mean that services will be available from this date, or that services will be available to every premise. Further deployment may take place in future, and build may also continue as part of our new sites activity and to deliver smaller in-fill programmes

openreach
